1491: New Revelations of the Americas before Columbus

By Charles Mann

1491 is not so much the story of a year, as of what that year stands for: the long-debated (and often dismissed) question of what human civilization in the Americas was like before the Europeans crashed the party. The history books most Americans were (and still are) raised on describe the continents before Columbus as a vast, underused territory, sparsely populated by primitives whose cultures would inevitably bow before the advanced technologies of the Europeans.
